Comment: Bids were solicited through newspaper advertisements and a mailing. This award was withheld on the October board meeting. Upon further District evaluation of the bids for the Emeritus College schedules, it is recommended that the Board take the above action.
CONSENT AGENDA: BUSINESS AND ADMINISTRATION

- RECOMMENDATION NO. 20-C PURCHASING: DESIGNATION OF SOLE SOURCE FOR LANGUAGE LAB MULTI-MEDIA EQUIPMENT

It is recommended that the Board of Trustees make a finding and adopt the position that the District would recognize no benefit nor realize any profit through bidding for multi-media learning systems.

It is further recommended that INTERNATIONAL TEACHING SYSTEMS, INC. be designated as a "sole source" for the digitally integrated multi-media equipment for the District's foreign language lab.

Comment: The Modern Language Department requires full digital integration of both audio and video in a language lab teaching environment to replace the traditional tape-based learning system. District research has indicated International Teaching Systems, Inc. is the only company that currently provides such a system.

The following County counsel opinion in the case of Graydon vs. Pasadena Redevelopment Agency (1980) 104 Cal. App. 3d 631 substantiates this recommendation: "Therefore, it has been held that where competitive proposals work an incongruity and are unavailing as affecting the final result, or where it is practically impossible to obtain what is required to observe for such, competitive bidding is not applicable."

- RECOMMENDATION NO. 20-D PURCHASING: AGREEMENT FOR LANGUAGE LAB MULTI-MEDIA EQUIPMENT

It is recommended that the Board of Trustees enter into an agreement with INTERNATIONAL TEACHING SYSTEMS, INC. for the purchase of a digitally integrated multi-media equipment system for the District's foreign language lab in an amount not to exceed $400,000.

Funding Source: Technology Block Grant

Comment: International Teaching Systems, Inc. is the only company that can provide digitally integrated audio and video equipment to replace the current tape-based system. Therefore, they have been designated as a sole source for the equipment which will replace old analog equipment with state-of-the-art digital equipment. This system has been installed at Pasadena City College and Cerritos College.
RECOMMENDATION NO. 21 DEVELOPMENT AGREEMENT WITH CITY OF SANTA MONICA

It is recommended that the Board of Trustees authorize the District to enter into a series of amendments to the Parking Structures' Development Agreement allowing the City of Santa Monica to construct a Municipal Pool Facility in the designated open space set back for Parking Structure C and in the space previously used for Parking Structure B (which was demolished as a result of the Northridge Earthquake), and further providing for the replacement of Parking Structure B on the Santa Monica College campus. Both projects shall be in accordance with California Environmental Quality Act and City standards.

**Funding Source:** The City of Santa Monica shall fund the Municipal Pool facility with a combination of grants and City funds.

Santa Monica College shall fund the Parking Structure replacement with a combination of FEMA funds, the reissuance of the Parking Certificates of Participation and parking revenues.

**Comment:** Both projects are in keeping with the District's Master Plan. The Municipal Pool facility will have a 50-meter competition pool, a separate recreation pool, and a locker room/office complex. The Parking Structure replacement will be greater than the 374 spaces that were in the demolished structure, and will be in the 450 space range designated in the Master Plan as an addition to Parking Structure C. A revised environmental report will be prepared to address the special issues required in a development agreement.

The Career Exploration in the Arts for Adults with Disabilities (CEAAD) Project will create a model for increasing the educational opportunities in arts instruction at the post-secondary level and building career pathways into arts-based employment for those with disabilities. Specifically, this project addresses the need to improve access to postsecondary arts and design instruction for people with disabilities, and to introduce work opportunities that combine art and design with digital technology.

Title of Grant: **Writer's Guild Project (Preliminary Application)**

Granting Agency: US Dept. of Education, Fund for the Improvement of Postsecondary Education (FIPSE) Comprehensive Program

Requested Funding: $394,038

Matching Funds: $219,036

Performance Period: September 1999 - August 2002 (three years)

Postsecondary students need to write proficiently to achieve their educational goals, but increasingly, students are graduating from high school as poor writers. Further, community colleges, as a major conduit for transfer students to four-year institutions, do not always ensure that students develop the writing skills needed to succeed at the four-year level. The proposed *Writers Guild Project* creates a guild of faculty and strong student writers linking three segments-Santa Monica High School (SMHS), Santa Monica College (SMC) and University of California at Los Angeles (UCLA)-whose charge is to create skilled writers.

Title of Grant: **Building Bridges to the Future: A Regional Approach to Information Technology (IT) Education at the Community Colleges**

Granting Agency: Microsoft/AACC: Working Connections Colleges

Requested Funding: $297,482
Matching Funds: $290,295 (Combination of SMC in-kind and business/industry contributions)

Performance Period: March 1, 1999 - June 30, 2001

The proposed effort comprises four objectives:

1. Create strong relationships with local business and industry, identifying their IT needs and tailoring programs to meet those needs.

2. Develop or strengthen IT program content through (a) IT certificate and/or associate's degree programs and (b) other certificate/associate degree programs with significant IT components.

3. Deliver quality IT education and training, with a special focus on attracting and graduating people from disadvantaged populations.

4. Increase community college faculty and staff expertise in IT.
