APPENDIX A: Update: Career Technical Education
APPENDIX B: SMC Schedule of Classes – Malibu
SUPPLEMENT TO THE AGENDA: Collective Bargaining Agreement with CSEA Chapter 36
IV. SUPERINTENDENT'S REPORT

• Management Association Report: Management Association President Judy Neveau reported that the M.A. is gearing up for the fall semester and, among other things, has organized a training webinar for managers in November and has signed up to get an orientation for the new Organic Learning Garden.

• Updates:
  – Performing Arts Center Year-End Report: SMC officials praised the custodial operations staff at the Broad Stage for their “herculean effort” to keep the facility clean, particularly in the face of the high usage and challenging aspects posed by this unique performance space. Appearing on behalf of the department were Anthony Barlow, Silvia Rosales and Marco Cadenas.
  – SMC Branding Project: A representative of Adams Morioka reported that the first phase of its brand strategy project has been completed to position the college and create a comprehensive visual identity system. Interviews with students, employees, alumni and others revealed that SMC has a strong culture characterized by pride and sophistication. Based on the interviews and research so far, the firm has recommended a brand platform to set SMC apart from its cohort institutions and on a path with aspirational institutions. Graphic identity options will be circulated in November. The Board hired Adams Morioka in May to create a comprehensive visual identity system for the college.

INFORMATION ITEM G

SUBJECT: UPDATE: CAREER TECHNICAL EDUCATION

SUBMITTED BY: Superintendent/President

SUMMARY: With the growing pressure from international competition and rapid technological change, the competitive position of the Los Angeles region and the state of California in the global marketplace is largely dependent on a highly skilled workforce. As a premier educational institution in the Westside region, Santa Monica College must produce a workforce that supports the critical industries in our region, the growth of existing business, and that of emerging industries.

The Office of Workforce and Economic Development aids the District in this endeavor by applying for and managing grants that assist departments in developing new programs, securing funding for professional development and for the purchase equipment that keeps CTE programs consistent with industry standards, and piloting not-for credit, short-term training programs and contract education in emerging industry sectors to test demand before developing credit programs in a new field.

The recent institutional research findings from various studies show that there is much to learn and implement in order to improve outcomes for CTE students. However, this report will demonstrate that SMC CTE students are successful in ways besides earning a certificate and degree. It is clear that CTE plays an important role in SMC’s and the state’s college completion agendas. In addition to improving completion rates, strengthening the SMC CTE mission will help the College meet critical regional and state workforce goals, improve equity goals, and increase post-secondary productivity due to the significant number of students identified as CTE concentrators and large number of students taking CTE courses.

*The complete report is included as Appendix A.*

RECOMMENDATION NO. 1

SUBJECT: AGREEMENT FOR ARCHITECTURAL AND ENGINEERING SERVICES FOR CONNECTION OF EXISTING FACILITIES TO CENTRAL PLANT

SUBMITTED BY: Superintendent/President

REQUESTED ACTION: It is recommended that the Board of Trustees approve the agreement for Architectural Services with Kishimoto Architects not to exceed $633,000 plus reimbursable expenses for architectural and engineering services for Connection of Existing Facilities to the Central Plant.

FUNDING SOURCE: Measure AA

COMMENT: The second phase of the central plant project will connect individual buildings to the chilled water loop. Some buildings already have equipment that can directly connect to chilled water; other buildings have equipment that is out of date or unable to directly connect and must be retrofitted.

The existing buildings included in the project are the Library, Science, Theatre Arts, Business, and Humanities and Social Science (HSS) buildings. Drescher Hall will be connected in the future during a separate modernization project.

In addition to the connection of air conditioning equipment this project also covers other infrastructure needs in these buildings including energy management, fire protection and security.

A Request for Qualifications (RFQ) was issued in March 2011. A total of eleven firms submitted a package. After a review of the submittals, three firms were invited to interview and the Kishimoto Architects team was determined to be the best fit for the project.

See next page for full scope.

SUBJECT: FACILITY DESIGN - HEALTH, PE, FITNESS, DANCE PROJECT

SUBMITTED BY: Superintendent/President

SUMMARY: The Health, PE, Fitness and Dance project will accommodate the Kinesiology, Athletics and Dance programs. The existing one-story PE locker rooms will be demolished and replaced by a three-story building that will also include the central plant equipment. The new building will include a large fitness center, weight rooms, fitness classrooms, dance studios, a climbing wall, and a variety of locker rooms. It will connect to the existing Gymnasium building.

The project has now completed the design development phase and the project architect, Gensler, will present an update on the planning and design of the building that will include 3D renderings.

INFORMATION ITEM I

SUBJECT: PREPARATION OF EDUCATIONAL FACILITY PLANNING AND ENVIRONMENTAL DOCUMENTS RELATED TO LEASE OF COUNTY OF LOS ANGELES PROPERTY IN MALIBU CIVIC CENTER

SUBMITTED BY: Superintendent/President

BACKGROUND:

On October 12, 2004, the Board of Trustees of the Santa Monica Community College District authorized entering into a Joint Exercise of Powers Agreement with the City of Malibu, creating the Malibu Public Facilities Authority (the “Authority”), in connection with the expenditure of General Obligation bond proceeds on projects located within the City of Malibu.

The Authority is currently active, and provides for the planning for, acquisition of, and operation of new instructional opportunities in the District intended chiefly to accommodate students from the City of Malibu, along with certain support facilities and necessary parking facilities (together, the “District Facilities”); and a related clean water facility for storm water and wastewater intended to resolve related environmental effects of the District Facilities. The District and the City of Malibu are each required to reach independent agreement as to the particulars of the appropriate properties and projects comprising the District Facilities, prior to the expenditure of up to $25 million in funds from Measure S, approved at the District's November 2, 2004 election.

In the 1970s and early 1980s, Santa Monica College had offered a full program of about 70 general education classes and several non-credit classes in Malibu each semester. Program reduction has occurred over time primarily due to the inability to secure sites to offer classes. The new facilities would provide for a permanent instructional facility. A copy of the Fall 1980 Schedule of Classes is attached (Appendix B).

On November 7, 2005, the Board of Trustees authorized providing $2.5 million of bond funds to the City of Malibu for the purchase of property to be used for holding storm water. On July 7, 2008, the Board of Trustees authorized providing $2.5 million of bond funds to the City of Malibu to be used for the construction of a wastewater facility. On April 20, 2010, the Authority approved the District’s leasing of certain property within the Civic Center owned by the County of Los Angeles for use as an educational center.

County of Los Angeles Lease Agreement. On April 19, 2011, the County of Los Angeles Board of Supervisors approved a request of the Chief Executive to negotiate a 25-year ground lease with the District (with 14 five-year options to renew) of approximately 128,500 square feet of land at the Malibu Civic Center at 23555 Civic Center Way for construction of an educational facility of approximately 20,000 square feet. The District would demolish the former Sheriff's Station in order to construct the educational facility.
The total cost would be $4,369,685. The District would prepay the equivalent of the entire net present value of the leasehold, totaling $4,369,685, by paying for and performing the demolition of the former Sheriff's Station and other County improvements on the leasehold, and additionally to pay for and perform some portion of the County's requirements for the remainder of its Malibu Civic Center property, up to the remainder of the total cost.

Any facilities built by the District must not interfere with the County’s use of retained facilities, including the Library, Courthouse, Public Works offices and garage, heliport, and communications tower. The County requires that improvements be architecturally compatible with existing facilities. The County will have the opportunity to review the site plan; and the right to approve the parking and circulation concept. A reciprocal parking easement arrangement will be negotiated so that District operations do not interfere with County operations.

The property will be restricted for use only for public educational and/or governmental purposes compatible with existing Civic Center uses and such other purposes as are approved by the County.

The County will require that the District include within its building at grade level up to 5,700 square feet for a Community Sheriff’s Station and Emergency Operations and Planning Center. Also, the County will require that the building include a classroom design that would facilitate conversion into an Emergency Operations Center for local emergencies.

**CEQA.** Should the Chief Executive Officer and the District negotiate a proposed lease agreement for recommendation to the District's Board of Trustees, appropriate environmental findings and documentation in compliance with the California Environmental Quality Act (CEQA) will be presented to the Board of Trustees at that time. The District will be the lead agency for purposes of CEQA.

**Discussion.** District staff recommends that the Board of Trustees proceed with the site planning, concept studies, and environmental studies necessary to negotiate the proposed lease of County of Los Angeles property for use as an educational center. These efforts will involve coordination with the City of Malibu, the County of Los Angeles, the Malibu Public Facilities Authority, and the Los Angeles County Sheriff's Department; residents and community parties of interest; adjacent and potentially affected property owners; area utilities and service providers; Caltrans; potentially the Santa Monica-Malibu Unified School District; and the Board of Trustees, among others.

Two recommendations are included in this agenda. Shane Parker, the principal of Parker Environmental Consultants, has recent project experience in Malibu preparing an environmental study for a proposed retail, commercial, and governmental office project in the Civic Center and has worked successfully with SMC on multiple environmental study projects, including most recently SMC’s Student Services and Pico Boulevard Improvements project and SMC’s 2010 Facility Master Plan update. Mr. Parker would prepare the environmental documents for the District. The Parker Environmental Consultant scope of work includes traffic and circulation. Masoud Mahmoud, the principal of m2 Strategic, provides project consulting and management representation for higher education, institutional, and governmental projects. As a senior member of Pepperdine University's management team for six years, he was responsible for over $200 million of design and construction, from feasibility to delivery. He also has twelve years of experience in various divisions of the Los Angeles County Department of Public Works and is a Malibu resident. Mr. Mahmoud would provide the District with onsite representation in Malibu.

SUBJECT: COLLECTIVE BARGAINING AGREEMENT WITH CALIFORNIA SCHOOL EMPLOYEES ASSOCIATION (CSEA) CHAPTER 36

SUBMITTED BY: Superintendent/President

REQUESTED ACTION: It is recommended that the Board of Trustees ratify the collective bargaining contract with the California School Employees Association (CSEA) Chapter 36 for a term beginning on July 1, 2009, and ending on June 30, 2012.

SUMMARY: On May 4, 2009, the District and CSEA’s initial collective bargaining agreement proposals were presented to the Board in accordance with the public disclosure requirements of Government Code Section 3547. On June 2, 2009, the Board invited the public to make comments on the proposals and thereafter adopted the District’s initial proposal.

The district’s negotiation team and the CSEA representatives concluded negotiations on September 22, 2011. This was a long and difficult negotiation process. The parties went through impasse procedures concerning the health care provisions of Article 12, concluding with the issuance of a fact-finding report on August 22, 2011.

Negotiations following issuance of the fact-finding report produced the tentative agreement that is now before the Board for ratification. CSEA members are scheduled to vote on the agreement on October 12, 2011.

A copy of the agreement is provided as a supplement to the agenda.

SUBJECT: SECOND READING AND APPROVAL - BOARD POLICY SECTION 2405, DISTRICT-WIDE CODE OF ETHICS

SUBMITTED BY: Superintendent/President

REQUESTED ACTION: It is recommended that the Board of Trustees conduct a second reading and approve the proposed Board Policy Sections 2405 – District-Wide Code of Ethics.

COMMENT: Development of a District-Wide Code of Ethics was an Institutional Objective in 2010-2011 in response to the following ACCJC Visiting Team’s recommendation:

Develop a District-Wide professional code of ethics be adopted as a Board Policy that is aligned with the mission, vision and goals and reflective of activity to support continuous improvement in all instructional, operational and service areas.

The proposed new Board Policy Section 2405, District-Wide Code of Ethics, was originally prepared by the DPAC Human Resources Planning Subcommittee, then revised and approved by the District Planning and Advisory Council on August 10, 2011. Suggestions made at the first reading on September 6, 2011 have been incorporated.

The Code of Ethics applies to all members of the Santa Monica College community. The college is committed to upholding the following ethical standards in carrying out its mission, vision, values and goals:

**Fairness**

Members of the college community will treat others fairly.

**Responsibility**

Members of the college community will be responsible stewards of the public trust by ensuring the proper use of public position, public resources, and college time, and by abiding by all laws and college policies.

**Integrity**

Members of the college community will be guided in all their activities by a high regard for the truth and committed to making decisions in the best interests of the college.

**Civility**

Members of the college community will show concern for others and their ideas and will create an environment of trust, care, and respect that is sensitive to the individuality and ideas of others.

Comment: This Amendment is for the redesign of the mechanical system and revisions to structural, architectural, civil and landscape required due to the connection of the Student Services Building to the new Central Chiller Plant. The fee includes coordination with the Central Plant Design team and the Division of the State Architect. Connecting the Student Services and Administration Building to the Central Plant will allow for the removal of the chiller, ice storage tanks, heat exchangers, chilled water pump and appurtenances associated with the current building design which will result in an approximate savings of $790,000 (the savings is equipment, piping, electrical and structure to hold the heavy equipment)… The original Student Services planning occurred many years ago before a central plant was contemplated for the campus.

4. Information Item: Citizens’ Bond Oversight Committee, October 19, 2011 Meeting
APPENDIX A: UPDATE: CAREER TECHNICAL EDUCATION

Submitted by: Patricia Ramos, Dean Workforce & Economic Development, Vice-Chair of Career Technical Education (CTE) Committee

Report Summary

With the growing pressure from international competition and rapid technological change, the competitive position of the Los Angeles region and the state of California in the global marketplace is largely dependent on a highly skilled workforce. As a premier educational institution in the Westside region, Santa Monica College must produce a workforce that supports the critical industries in our region, the growth of existing business, and that of emerging industries.

The Office of Workforce and Economic Development aids the District in this endeavor by applying for and managing grants that assist departments in developing new programs. We secure funding for professional development and for the purchase equipment that keeps CTE programs consistent with industry standards. We pilot not-for credit, short-term training programs and contract education in emerging industry sectors to test demand before developing credit programs in a new field.

Our recent institutional research findings from various studies show that we have much to learn and implement in order to improve outcomes for CTE students. However, this report will demonstrate that SMC CTE students are successful in ways besides earning a certificate and degree. It is clear that CTE plays an important role in SMC’s and the state’s college completion agendas. In addition to improving completion rates, strengthening the SMC CTE mission will help the College meet critical regional and state workforce goals, improve equity goals, and increase post-secondary productivity due to the significant number of students identified as CTE concentrators and large number of students taking CTE courses.

Career Technical Education Mission at SMC

The Career Technical Education (CTE) mission of Santa Monica College is not as well understood as its transfer mission. As such, the CTE mission at Santa Monica College has only in recent years received the needed attention. This rich and complex mission can benefit from more attention and greater understanding by College stakeholders especially when viewed within a context of state and national workforce trends and economic conditions.

Motivated by the strategic priority adopted by the SMC Board of Trustees and College governance committees, the CTE Committee of the Academic Senate, and the Office of Workforce and Economic Development have dedicated the last two years to studying patterns of CTE student enrollment and progress. The Office of Institutional Research has provided the CTE Committee with vital comprehensive data analysis and has included CTE as a focus in its research agenda.
This Board update contains components of a broader research agenda aimed at understanding how SMC could best promote the success of students who pursue programs in occupational fields of study. This brief report will focus on efforts underway to better understand CTE at SMC and improve outcomes. Included are updates of new CTE programs. The contents of this report include:

- Career Technical Education Infrastructure
- The new CTE-BSI Research Collaborative
- Completer/Leaver Survey highlights
- NEW CTE Programs and Updates

Career Technical Education Infrastructure
Career Technical Education at SMC prepares students for entry-level employment opportunities, ranging from one semester to four semesters. SMC offers numerous options spanning 9 industry sectors. Credit programs include:

- 37 CTE related Associate Degrees,
- 33 Certificates of Achievement
- 22 CTE Department Certificates

Who are CTE Student Concentrators?
31138 students enrolled in fall of 2010. A total of 7506 or 24.1% of credit students are CTE concentrators (enrolled in one or more credit courses coded SAM code ‘B’ or ‘C’).

New CTE-BSI Research Collaborative
In an effort to better understand and improve CTE outcomes, Jeff Shimizu, Vice-President of Academic Affairs, formed a committee that includes CTE and Basic Skills chairs, along with initiative administrative leaders. This collaborative research project began this summer and is funded with SB70 and BSI funds.

The main goal of this committee is to explore the possibility of 1) identifying common/ basic and technological skills needed for emerging careers SMC is currently pursuing 2) to discuss developing courses that teach basic skills in the context of occupational skills training 3) discuss innovative programs and approaches which have or could increase student success in CTE areas.
Understanding barriers to completion is critical to improving outcomes. Data reviewed includes: CTE awards and degrees; time to completion of awards; Basic Skills status. We are also seeking to know how many students satisfy certificate requirements but fail to earn one and why? We also hope to better understand what levels of English and math certificates should require. What are the major barriers to completion in CTE? Could this committee contribute to intervention strategies to improve CTE outcomes? Although this committee has met only a few times, we have reviewed best practices, and analyzed research data provided. The following is a sample of some preliminary findings:

- The persistence and graduation of CTE concentrators is low
  - The persistence may be low because of the course reductions; how can we keep courses open to help the progress of students, especially in courses that are only offered once a year
- A large proportion of CTE concentrators already have degrees
  - How can we serve the professional development students or those who only come to us for courses only and not a certificate or degree?
- CTE students with degrees still enroll in basic skills courses
  - It is clear that we should still focus on math and English skills in the CTE courses as degree holders still enroll in these courses.

Implementing more effective instructional practices could mean including student-centered models, peer group support, accelerated courses, and courses that teach basic skills in the context of occupational skills training. These are all things we have done quite successfully with Promo-Pathway. However, contract funding has allowed for the unique design of services in this relatively small program (25 students). The challenge is creating programs which impact larger numbers of students.

The committee includes: Chris Fria, Frank Dawson, Fariba Bolandhemat, Vicki Drake, Laura Manson, Susan Sterr, Laura Campbell, Alan Emerson and Counseling Chair, Laurie Guglielmo. The administrators include Roberto Gonzalez, Maria Leon-Vasquez, Hannah Alford, and Tricia Ramos.

Early recommendations from the committee include exploring the feasibility of:
- Implementing an online portal to collect departmental certificates so we can count them as successes; right now, there is no systematic way to collect and store this information and it varies from department to department
- Advertising certificates via counseling
- Offering math modular courses that are self-paced and are CTE program specific. Encourage students to take these courses before or while enrolled in CTE courses in order to serve the students with varying math levels in CTE courses
- Implementing writing across the curriculum with broad CTE themes (technology, education, etc.)
- Administering a survey in the beginning of the CTE courses to capture students who just want to take one course and update contact information

Completer/Leaver Survey
Tracking employment outcomes of CTE students is critical to the success our programs and it is a major challenge for college personnel. Having this information would allow the college to better understand the impact of our educational programs in CTE. Therefore, the CTE Committee used Perkins funds to pilot a qualitative study conducted by our Office of Institutional Research. The college surveyed 1,232 former CTE students who earned a career certificate or associate degree (Completers) and those who took substantial coursework in a CTE program but did not receive an award (Leavers). Students returned 173 surveys for a response rate of 14.0%.
The following points summarize the major findings of the survey study. To view survey and findings in its entirety, visit:

• About 43% of survey respondents had earned an associate or higher degree prior to enrolling at SMC. The large proportion of former CTE students who already have a degree implies that a certificate, degree, or transfer goal may not apply to all students.

• A larger proportion of Leavers (32.7%) reported that the primary reason for attending SMC was to obtain or update job-related skills or for personal enjoyment or self-improvement than Completers (9.3%). The data has implications for using award completion as the sole measure for CTE student success. Nearly one-third of Leavers indicate that their primary educational goal at SMC was not to earn a certificate, degree, or transfer but to obtain or obtain job skills or for professional or personal development. Therefore, it is important to identify other measures of student success.

• Although they left the college without earning a certificate or degree, a large majority of Leavers (84.4%) reported that they were satisfied with the education they received at SMC.

• A large majority of survey respondents reported that the courses at SMC helped them obtain their current job, advance in their current job, improve their job performance, and or improve their overall employability. Disproportionately fewer Leavers reported that SMC helped them on all four points when compared with Completers; however, the percentages of Leavers who indicated that SMC did help them were still high (64% to 76%). Although they did not earn a certificate or degree, a large majority of Leavers reported benefits of attending SMC, including obtaining or advancing in their current employment and improving their job performance and overall employability.

• On average, students reported a gain of $5.41 in hourly wage when comparing their wages before and after attending SMC.

• Overall, with the exception of dental, survey respondents reported a gain in benefits, including medical, vision, retirement, vacation, and paid sick leave. A fewer proportion of Leavers reported having these benefits after leaving SMC when compared with before their education at SMC; however, Leavers reported a 20% gain in opportunities for pay increases and 27% gain in opportunities for promotion after leaving SMC.

• A large majority of survey respondents reported using general work, computer/technology, interpersonal, reading and writing, and math skills in their current jobs.

This finding has implications for the curriculum of CTE programs. In addition to discipline-specific knowledge and skills, survey respondents reported using soft skills in their jobs on a regular basis.

• Among the options listed for the primary reason Leavers left SMC without earning a certificate or degree, the highest proportions of students (15% each) reported that they did not have enough time for classes or transferred to another college. Twelve or 14% of the respondents indicated that they reached their goal and earned a departmental certificate.

The finding suggests that students who leave SMC may have other reasons besides academics. In addition, a large number of former students reported they left the college because they earned a departmental certificate. Although the Chancellor’s Office does not recognize the departmental certificate as a formal award, students recognize it as an achievement.
Emerging CTE Program and Funding Updates
New programs are added in response to emerging industries and careers in our region. Several of these are credit programs that have already begun. Others have completed the curriculum process and will launch in the next academic year. Some have begun as contract education. Programs described below (with the exception of Resource and Recycling Management) are still in the development stage and must complete the curriculum and certificate/degree process. Two have launched in the 2010-2011 academic year and two will launch in 2011-2012. What makes these programs unique and exciting is their interdisciplinary content and design.

Promo-Pathway

The viewing audience is rapidly changing into a diverse demographic with unique social cultural realities, varied product and programming interests, and divergent ways of using technological platforms. Despite this change and diversified psychographic landscape, marketing departments at many entertainment companies and networks remain in large part ethnically and culturally homogenous, struggling to produce marketing strategies that effectively connect to diverse populations.

This unique education initiative gives young creative talent the opportunity to develop promo-editing-marketing skills. The pathway exposes students to arts education and leads into intensive program focused specifically on promo production. There exists a relative lack of diverse perspectives, experiences, and identities in on and off air, media strategy and planning, PR, communications, promo, graphic design, motion design, broadcast and interactive media. The program is focused on building a sustainable diverse talent pipeline for the media/entertainment marketing industry with strong industry collaboration. The pathway provides basic remediation skills when needed. Santa Monica College is the first institution in the nation to offer this unique degree program.

The Promo Pathway program has been developed with contract education funding provided by South Bay Center for Counseling in association with the industry trade organization Promax. Communication Department chair Frank Dawson has designed the new curriculum and program.

New classes include:
Broadcasting 20: “Introduction to Writing and Producing Short-Form Media” (CSU)
Broadcasting 21: “Short-Form Visual Media Production” (CSU)

Medical Laboratory Technician (MLT)

A new occupation in California has emerged whose purpose is to alleviate the clinical laboratory workforce shortage, which is by most industry estimates, in a crisis.

Recently licensed by the state of California, the Medical Laboratory Technician (MLT) is being touted as the needed middle step in the clinical laboratory career ladder—bridging the gap between the lower rung jobs of Phlebotomist and Laboratory Assistant and the high rung job of Clinical Laboratory Scientist (CLS), which is most in demand. This creates an opportunity for Santa Monica College because Medical Laboratory Technicians only require a two-year associate degree.

The MLT program has received funding from UCLA Medical Center for nearly $400,000 for two years. It requires and has strong industry commitment (with UCLA and St. John’s Hospitals). Currently only three community colleges in the state are operating an MLT program. The MLT program will be housed in the Life Sciences academic department and will launch in Fall, 2012. New courses include:

MLT 1: “Introduction to Clinical Laboratory Profession” (1 unit, CSU)
MLT 2: “Hematology, Coagulation, Urine and Body Fluid Analysis” (5 units, CSU)
MLT 3: “Blood Banking and Immunology” (5 units, CSU)
MLT 4: “Clinical Chemistry” (5 units, CSU)
**Resource and Recycling Management Program**
Through a Department of Labor grant, SMC is leading a consortium of community colleges and environmental advocates to provide training and education programs that supports the growth of recycling and resource management industry. The project serves both Los Angeles and Orange County. This training and education program began in July, 2010 with industry not-for-credit training and launched is much anticipated academic program this Fall, 2011. It compliments SMC’s sustainable technologies program and is housed in the Earth Sciences Department.

In collaborating with faculty at Irvine Valley College and Golden West College, as well as industry partners, this Community-Based Job Training will likely become a national model. The program demonstrates SMC’s commitment to environmental and ecological responsibility. The new core courses in this program are:

RRM 1: “Introduction to Resource Management” (CSU; Global Citizenship)
RRM 2: “Culture and Zero Waste” (CSU)
RRM 3: “Resource Management and Zero Waste for Communities” (CSU)

**Homeland Security**
Homeland Security is the largest agency in the federal government. Homeland Security/Emergency Management is a program that has the potential for enormous growth and variety, outside of a traditional criminal justice program.

Through the hard work and diligence of a small team of administrative staff led by Al Vasquez, Santa Monica College has been selected to participate in the Transportation Security Agency (TSA) contract training program. Though implementation of the TSA contract training program is pending further negotiations, it is indeed an honor to have been selected to train LAX’s Transportation Security Officers (TSOs) as it is the largest base in the nation. TSA training will be the first focus under a larger Homeland Security program envisioned. The curriculum and new certificate of achievement program are currently under development.

The program will to every extent possible, align with existing training academies and universities that offer programs that students can articulate to. Other planned Homeland Security programming could include curriculum in cyber security, emergency management and prevention, and terrorism in a geopolitical context.
