

Current Events Activity

Supplies

Article from a newspaper or journal or a you tube video, relating to sustainability – and the topic being discussed that week (*i.e.*, Water, Chemicals, etc.)

The article shouldn't be more than 2 pages long.

Step 1:

The Discussion Facilitator brings an article from a newspaper or journal. If there is more than one Facilitator for that week, they each bring a different article.

The Discussion Facilitator reads the first paragraph of the article out loud. Then, he/she passes it clockwise, and the person next to him/her reads the next paragraph. Crew Members continue passing on the article, until every paragraph has been read out loud.

Step 2:

The Discussion Facilitator asks Crew Members the following questions:

- a) How does this article relate to sustainability?
- b) **What** is the issue?
- c) **Who** are the stakeholders? Does anyone benefit from the situation? Is anyone harmed by the situation?
- d) How does this issue relate to your life?
- e) What can you do to help?
