

# Show-&-Tell Activity

## Supplies

- Show-&-Tell bags for the Waste, Chemicals, or Shopping & Food meetings
- The Show-&-Tell bags will be stocked and in the crew meeting area.

## Step 1:

Crew Members get in groups of 2-3 people and each group selects an item from the Show-&-Tell box.

## Step 2:

Crew Member groups of 2-3 discuss their chosen item, using the following discussion questions:

- a) What makes this product sustainable?
- b) What product that you might currently use at home does this one replace? (ex: Windex vs. non-toxic glass cleaner)
- c) Is there a lot of packaging? Is the packaging recyclable?
- d) Does the product label tell you where it was manufactured?

### Step 2.a. (for Chemicals Week only):

*Crew Members read page 150 in the Workbook to identify which ingredients in household products are toxic to human health and/or the environment.*

*If Crew Members choose a “base” ingredient for making your own cleaning products (like baking soda or vinegar), they should turn to page 154 in the Workbook to see what kind of products they can make with their chosen ingredient.*

## Step 3:

After discussing their chosen product, each group of 2-3 Crew Members presents their product to the entire Crew, answering the questions in Step 2. They can pass around the product for all to see.
