Path to Sustainable Energy Training

Do you want to learn more about Energy Efficiency?

Producing, transmitting and consuming energy in the most efficient and sustainable manner is one of the biggest challenges we face globally in the 21st Century. In order to have a greater impact on the environment we must create new careers in sustainable energy in order to prosper while reducing greenhouse gas emissions. At Santa Monica College, we recognize the path to sustainable energy starts with Conservation and Energy Efficiency and follows with Renewable Energies. Our goal is to educate and provide training and resources to create economic impact in the area of Sustainable Energy.

Energy Efficiency Auditing

Join the rapidly expanding Green Collar economy by learning about Energy Efficiency and weatherization. Energy efficiency is the first step when considering renewable energy solutions such as solar.

This 27-hr course provides training in the basic energy concepts needed to be successful as an Energy Efficency Auditor. Course topics include: basic energy concepts, identification of energy efficiency measures, uses of energy auditing tools, how to perform energy assessments, weatherization, and the effective communication of cost-effective, sustainable energy measures.

In addition you are invited to participate in the 6-hr business boot camp if you are interested in launching your own business as an Energy Efficiency Auditor.

Dates: 
- October 19, 21, 26, 28
- November 2, 4, 9, 11
- November 16, 18, 23

Times: 
- 6:00 - 9:00 pm

Fee: $350

Course Instructor: Stuart Cooley

Course Location: SMC Bundy Campus, Room 212

Additional Information: Fee waivers are available for displaced workers from the construction industry. Please contact the Marina Del Rey Work Source Center for questions regarding eligibility requirements: (310) 309-6000 x248
