

CATALINA ISLAND

22 miles from Los Angeles!

Spring Break Field Class: GEOG 35F

Earn college credit while exploring one of California's most beautiful marine environments! Join our immersive Geography field course on Catalina Island to study marine ecosystems, coastal geology, and the island's unique geography.

- Kayak and snorkel in clear coastal waters
- Explore the incredible biodiversity of Catalina's kelp forests
- Learn about island biogeography, including the island fox
- Stay on site at the USC Wrigley Marine Science Center

APRIL 13-17, 2026
