

A Course of Study for

GEOSPATIAL TECHNOLOGY

Geospatial technologies, including geographic information systems (GIS), remote sensing (RS), global positioning system (GPS) and digital cartography, are used to capture, store, manage, analyze, and visualize geospatial information related to locations on Earth's surface. These technologies are used to combine various types of geospatial information in a digital environment and are widely used in our daily life, government agencies, and in almost every industry. Through this program students will develop an understanding of the theoretical underpinnings of geospatial technologies and gain the skills needed to construct high-quality applications.

PLEASE NOTE: Students must petition the Earth Science department to obtain a Department Certificate in Geospatial Technology.

PROGRAMS OFFERED

- Transfer Preparation
- Geospatial Technology Studies Department Certificate (15 units)
- Career Opportunities

DEPARTMENT CERTIFICATE REQUIREMENTS

A Department Certificate is granted upon successful completion of a program of study with a **designated minimum number of units**, including:

- Completion of the area of emphasis with a grade of C or higher in each course, or with a P if the course was taken on a Pass/No Pass basis, and the P is equal to a C or higher;
- Completion of at least 50% of area of emphasis units at Santa Monica College;

CATALOG RIGHTS

A student may satisfy the requirements of a degree that were in effect at any time of the student's *continuous* enrollment. Continuous enrollment is defined as enrolment in consecutive Fall and Spring semesters until completion.

TRANSFER PREPARATION

Many colleges/universities offer baccalaureate degrees in various Earth Sciences. Students planning to transfer to a four-year college or university should complete the lower-division major requirements and the general education pattern for the specific transfer institution.

SMC has articulation agreements with the many UC and CSU campuses, as well as several private and out-of-state institutions.

Exact major requirements for UC and CSU campuses can be found online at *assist.org*.

A listing of private, nonprofit California colleges and universities can be found online at *aiccu.edu*. For articulation agreements between SMC and some of these institutions see *smc.edu/articulation*.

CAREER OPPORTUNITIES

Over 80% of data used for decision-making in government, business and industry has a spatial component (i.e. geospatial data). New areas of rapid growth are in criminal justice, homeland security, marketing, retail site location, resource allocation, banking, health-care, planning, disease control, insurance, real estate, and disaster preparedness, management, and response. Most local, state, and federal government agencies use geospatial technologies and maintain a staff of GIS technicians, Geospatial analyst and GIS professionals. Geospatial technologies are also commonly used in the private sector by businesses, planners, architects, foresters, geologists, environmental scientists, archaeologists, real estate professionals, marketers, sociologists, and bankers. The expansion of jobs using geospatial technologies is anticipated to continue for many years to come.

GEOSPATIAL TECHNOLOGY, DEPARTMENT CERTIFICATE

Program Learning Outcomes: Upon completion of the program, students will apply cartographic principles of scale, resolution, projection, and data management to solve a geographic problem using geospatial technologies.

Students will demonstrate proficiency in spatial data collection and manipulation, spatial data management, spatial analysis, and spatial modeling using geospatial technologies.

Students will also execute an original GIS project under the supervision of a faculty or professional mentor, and demonstrate the ability to communicate project outcomes orally, in writing, and graphically.

AREA OF EMPHASIS: (15 UNITS)

Required Courses: (15 units)

GEOG 20, Introduction to Geographic Information Systems (3) *(same as GIS 20)*

GEOG 23, Intermediate Geographic Information System (3) *(same as GIS 23)*

GEOG 25, Introduction to Cartography (3) *(same as GIS 25)*

GOEG 26, Introduction to Remote Sensing (3) *(same as GIS 26)*

GIS 27, Applications in Geographic Information Systems (3)
